DETAILED ACTION

The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1648.

Response to Amendment

The receipt of preliminary amendments of A, and B filed on 3/27/2002, are acknowledged. Claims 1-27 have been canceled. Claims 28-59 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 28-33, drawn to T cell epitope and functionally variant thereof.

Group II, claim(s) 28, 34-38, drawn to a compound comprising a T cell epitope.

Group III, claim(s) 39, 40, drawn to nucleic acid and expression vector.

Group IV, claim(s) 41-44, 50-52, drawn to cells containing T cell epitope.

Group V, claim(s) 28, 45-47, drawn to a complex comprising T cell epitope.

Group VI, claim(s) 48, 49, 53, drawn to method of in vitro detection.

Art Unit: 1648

Group VII, claim(s) 54, drawn to an assay system for in vitro detection of the activation of T cells.

Group VIII, claim(s) 55, drawn to a method of causing an immune response.

Group IX, claim(s) 56-59, drawn to a medicament or diagnostic agent.

The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of Group I is known in the prior art as evidenced by Heino et al (1995) wherein the reference teaches an isolated and purified T cell epitope (see page 1143, Table 1). The cited evidence proves that the technical feature of Group I does not make a contribution over the prior art. Thus, the claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 1648

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. R. Salimi whose telephone number is (703) 305-7136. The examiner can normally be reached on Monday-Friday from 9:00 Am to 6:00 Pm.
